

IMPORTANT COMPONENTS

TO CONSIDER WHEN DESIGNING INTERVENTIONS TO OPTIMISE CAESAREAN TARGETING HEALTHCARE PROVIDERS

TRAINING

Trainings are delivered to improve providers' knowledge and skills on both labour management and the intervention itself

DISSEMINATION

Caesarean section indications are actively disseminated through guidelines, information, education, and communication (IEC) materials, and reminder systems

AUDIT & FEEDBACK

Each audit and feedback cycle produce clear and actionable recommendations to be implemented

MULTIDISCIPLINARY COLLABORATION

Multidisciplinary collaboration across cadre of health workers (obstetricians, doctors, nurses, midwives) are encouraged and promoted

HEALTH PROVIDERS' WILLINGNESS

Health providers' willingness to change are assessed and addressed

BOTTOM-UP APPROACH

Utilising reflective nature of interventions when all above components are implemented where discussions and consultations are leveraged
